

MADE IN GERMANY

## **Coffee indulgence for 2009.**

Inspired by the trend for coffee, Arzberg has allowed fantasy to blossom.

The coffee cult is still going strong. On average, each German drinks four cups of coffee a day, this is the equivalent of 160 litres or 6.7 kg a year. This trend is ripe for new ideas, such as the flower-shaped Arzberg tray. With its metal handle, the tray is a great way to serve coffee to guests. A smart design in six pleasing colours from the "Profi" range as well as a white version. The tray not only looks great but is also a hit for cakes, pastries and finger food. Fruit and delicious sandwiches can also be served in a decorative and mouth-watering way. The eye catcher for parties and celebrations or for simply enjoying a cup of coffee with friends.

Once again, Arzberg has added a touch of creativity to the table with functionality, a design which is suitable for everyday use and fun.
