

MADE IN GERMANY

Practical freshness from Arzberg – because fridges aren't round!

Square, functional, reliable and ideal for everyday use: the pioneering freshness factor from Arzberg. The components of the food-safe, freezer-safe storage system are truly multi-talented. The boxes store and keep food fresh and also seal the flavour in – both in the fridge and on the table.

Its pioneering, unique sealing mechanism allows air to escape using a gentle push effect. It is also easy to close: a vacuum-tight seal is created by pushing gently on the lid. This unique function, made up of one piece, is 100% hygienic, temperature-resistant and child's play to handle. Furthermore, the aroma boxes can be stacked on top of and next to each other in order to save space. Gone are the days of messy fridges! But it's not just the inner features of these modern kitchen assistants from the Arzberg design house that count, the vacuum lids are now also available in four new fresh colours.
