

MADE IN GERMANY

TRIC Clever ideas for a brighter life.

The extremely pleasing design and almost endless colour combinations make "Tric" one of the most popular long-selling ranges. Mix and match, be up-to-date, be individual – the Tric concept can always be relied on to bring a feeling of variety and fun to the table.

The new contemporary "*Colours*" range is just one more Tric highlight. Stripes in all the Tric colours merge to create an unusual and bright decorative border. And, since all the Tric colours are included, this range is the ideal addition for all Tric fans.

With this new innovation, Arzberg has once again confirmed its reputation as a trendsetter. What's more, it also provides an impressive sales argument: the more colours and combinations a range has to offer, the more fun the consumer can have when it comes to mixing and matching.
